CAMEREN DOWNS

Virginia Beach / Norfolk, VA | (540) 376-1006 | Camerendowns@gmail.com

PROFESSIONAL SUMMARY

IT and cybersecurity professional with hands-on experience supporting enterprise security operations, endpoint monitoring, SIEM workflows, Microsoft 365, SharePoint, Bluebeam, and technical user support in a commercial construction environment. Experienced with CrowdStrike Falcon Next-Gen SIEM and EDR, identity-based detections, malware investigation, alert workflows, and cross-platform troubleshooting. Holds bachelor's degrees in Computer Engineering Technology and Electronics Engineering Technology and is pursuing a master's degree in Computer Science. Combines cybersecurity, engineering, documentation, training, and project coordination skills to improve technical operations and reduce risk.

CORE TECHNICAL SKILLS

Cybersecurity & Monitoring	CrowdStrike Falcon EDR, Falcon Next-Gen SIEM, identity detections, alert workflows, IOC review, event/log analysis, malware investigation, detection gap analysis
IT & Administration	NinjaOne RMM, Active Directory fundamentals, endpoint troubleshooting, Microsoft 365, Outlook, Teams, user support, account and access support
Construction Technology	SharePoint document management, Bluebeam Revu, drawing/link management, addendum and document-version verification, project technology support
Programming & Engineering	Python, C++, AutoCAD, Multisim, Arduino, Raspberry Pi, OpenCV/TensorFlow, embedded systems, oscilloscope and electronic test equipment

PROFESSIONAL EXPERIENCE

S.B. Ballard Construction Company | *IT / Cybersecurity* **2025 - Present**

Virginia Beach, VA

- Administer and support CrowdStrike Falcon EDR and Next-Gen SIEM capabilities, including detection review, identity-based alerts, workflow automation, and security event investigation.
- Build and refine security workflows and correlation use cases across endpoint, identity, VPN, SMB, firewall, proxy, and cloud application data to improve visibility into suspicious activity.
- Investigate endpoint and user-security issues using CrowdStrike and NinjaOne, including software and malware installation activity, account lockouts, telemetry review, and remediation follow-up.
- Support Microsoft 365 technologies including Outlook, Teams, SharePoint, and file-management workflows; assist users with access, collaboration, and document organization issues.
- Train project teams on SharePoint and Bluebeam Revu, verify drawing/addendum versions in the field, and help ensure project staff are working from current construction documents.
- Create technical documentation, meeting support materials, checklists, security explanations, and end-user guidance for both technical and non-technical coworkers.
- Research and communicate practical AI tools and features for construction staff, including ChatGPT, Microsoft Copilot, and PLAUD AI, with emphasis on productivity and responsible use.

Norfolk State University Women's Basketball | *Head Team Manager*
Norfolk, VA
Aug 2022 - Present

- Coordinate practice operations, equipment, schedules, and day-to-day logistics for coaches, players, managers, and practice staff.
- Supervise student managers and practice players while maintaining organized, efficient team operations.
- Support coaches with administrative tasks, communication, player-development activities, and event preparation.

EDUCATION

Old Dominion University | *Master of Science in Computer Science*
Norfolk, VA
In Progress

- Graduate coursework includes cybersecurity, cryptography, data systems, machine learning concepts, and computer science topics applicable to security detection and analysis.

Norfolk State University | *B.S. Computer Engineering Technology & B.S. Electronics Engineering Technology*
Norfolk, VA
May 2025

- GPA: 3.7 | Technical focus in programming, electronics, embedded systems, networking, engineering design, testing, and technical documentation.

Butler Community College | *Associate of Science in Liberal Arts*
El Dorado, KS
May 2022

- GPA: 3.3 | Dean's List (2 semesters) | All-Academic Team (2x) | Women's Basketball student-athlete.

SELECTED ACADEMIC PROJECT

Object Tracking Camera - Senior Project | *Computer Engineering Technology*
Spring 2024

- Designed and implemented a smart camera system using Raspberry Pi, Python, OpenCV, and TensorFlow to detect, classify, track, and respond to objects in real time.
- Integrated motor control, computer vision, hardware interfaces, and system testing; documented technical operations and collaborated with a multidisciplinary team through final presentation.

ADDITIONAL EXPERIENCE

Amazon Fulfillment Center - Night Shift Associate (2022) | Harmony at Fall Run - Server (2021) | Subway - Team Member (2020) | Boys & Girls Clubs of America - Youth Mentor
